Alexey Mitjaew Hupat

+56 9 4460 7422 | Chicureo, Región Metropolitana | alexey.mitjaew@sansano.usm.cl | linktr.ee/amitjaew

Education

Universidad Técnica Federico Santa María Jan 2020 — Jan 2026
Telecommunications and Computer Networks Engineering *Región Metropolitana, Campus San Joaquín*

- **Academic Merit Award** for six consecutive years (weighted academic score average ≥ 80%).
- **Attended courses** in Probability & Random Processes, Numerical Analysis, Data Mining, Machine Learning, Digital Image Processing, Computer Vision, Operations Research.

Work Experience

Full Stack Engineer Jul 2026 — Present
Gente Social Research (somosgente.cl) *Remote*

- Developed and deployed backend systems for social observation and synthetic audience simulation
- **Tools used**: OpenAI API, Apify, Svelte, FastAPI, Docker, Claude Code

Developer Feb 2026 — Jun 2026
Magnar *Remote*

- Developed scraping/extraction modules for Latin American institutional legal documents, integrated into the knowledge base of a generative AI system
- **Tools used**: TypeScript, Web scraping, Claude Code, GitHub Actions

Software Engineering Intern Aug 2025 — Jan 2026
Universidad Técnica Federico Santa María *Hybrid*

- Developed Backend Systems for Teloprogramo, an AI-powered coding challenge platform for STEM students with personalized exercises and real-time feedback
- Project selected for IDeA I+D 2025 innovation funding for creating an inclusive system with accessibility features for visually impaired users
- Built systems for dynamic C++/Python challenge generation with unit test creation and code parsing/compilation
- **Tools used**: Language Model Inference, PyBind, UnitTest (Python library)

Freelance Fullstack Developer Mar 2024 — Jun 2024
MyFuture AI *Remote*

- Developed data-oriented fullstack solutions for a one-time contract
- Created a datapanel for accessing global KPI and inventory/sales data visualization
- **Tools used**: FastAPI, MySQL, ReactJS, Google Charts

Frontend Developer Intern Dec 2023 — Feb 2024
MyFuture AI *Remote*

- Worked on frontend development for a productivity-oriented chatbot
- Implemented dynamic and responsive features to improve accessibility and user experience across multiple devices
- **Tools used**: TypeScript, ReactJS, Tailwind CSS, and Redux

Projects

Data Analyst, Twitter Analysis github.com/amitjaew/twitter_community_analysis

- Extracted tweets from X related to the Belarusian Doll case
- Performed sentiment analysis to characterize the emotional tone of the discourse
- Built interaction graphs and detected communities
- Identified patterns of polarization and potential discursive bubbles
- **Authors**: Alexey Mitjaew, Patricio Salvatierra, Aymara Rojas
- **Tools used**: Python, Selenium, pandas, networkx, pysentimiento, Louvain

Skills

- **Languages**: Spanish (Native) / English (Professional)
- **Programming & Tools**: Python, SQL, Jupyter

- **Data Analysis & Visualization**: pandas, NumPy, Matplotlib, Seaborn, Plotly
- **Machine Learning**: Scikit-learn, statsmodels
- **Data Collection**: Web scraping, Selenium, APIs
